Profile

Computer Science student at the University of Rostock, currently in my 5th semester and entering my 6th semester in April 2027. I have hands-on experience in software development, web applications, and security-related projects, with a strong foundation in Java, Python, C, JavaScript, and SQL. Through university coursework, personal projects, and practical experience as a teaching assistant at university, I have developed strong problem-solving and programming skills. I would like to apply for a 20-week internship at your company, starting in April 2027.

Education

Bachelor of Science in Computer Science

University of Rostock, Rostock

since 10/2024

- Currently in the 5th semester
- Current GPA: 1.8 (after 4 completed semesters)

Practical Experience

Teaching Assistant – Imperative Programming

University of Rostock, Rostock

10/2026 – 12/2026

- Grading and providing feedback on homework assignments for 1st-semester students in imperative programming

Teaching Assistant – Algorithms and Data Structures

University of Rostock, Rostock

04/2026 – 06/2026

- Graded and provided feedback on homework assignments for 2nd-semester students in algorithms and data structures

Industry internship

Punker GmbH, Eckernförde

10/2022

- Supported workshop and production tasks while gaining insight into industrial manufacturing and quality control

Projects

Personal Portfolio Projects

Selected projects available on my portfolio and GitHub (links above). Highlights include:

- **Web Portfolio** — Personal website built with HTML, CSS, and JavaScript to showcase projects and documentation.
- **Scrum board** — Developed a simple Scrum board application to visualize and manage project tasks (Java/Python), including user interaction and data persistence.
- **Mini-SIEM** — Security log analyzer built with Python, FastAPI, SQLite, HTML, and JavaScript. Ingests SSH and HTTP logs, detects brute-force attacks and port scans, and presents prioritized alerts with configurable rules, event search, timelines, and JSON/CSV export.

Secondary Education

General Higher Education Entrance Qualification (Abitur) (grade: 1.6)

Jungmannschule, Eckernförde

06/2024

Skills

Programming: Java, Python, C, JavaScript, SQL, Prolog, Haskell

Web: HTML, CSS, JavaScript, FastAPI

Tools & Technologies: Git, LaTeX, Linux, VS Code

Languages: German (native), English (C1.1)

Availability

Available for a 20-week internship starting from 1.4.2027. Full-time commitment; relocation or remote work negotiable.
